Daniel,

This is great! We have no problem if you want to participate in level 2 and limit what data is collected on your system (e.g., no unregulated contaminants). Just put that in your letter and note you can do level 2 with that qualifier. Can you please send an electronic copy of the letter (signed PDF) noting your commitment? Thank you very much!

Regards,
Susan

Susan,

Russell and I talked about this and we would be happy to participate at Level 1. We would also entertain participating at Level 2, as long as unregulated contaminants are not monitored. We would prefer to focus on microbiological pathogens. As for Level 3, we are not interested in participating at that level.

Please talk to your team and let us know if you are still interested in utilizing our system.

Russell and Daniel,

We recently kicked off a new project with the Water Research Foundation on potable water reuse (WRF 4508). Channah Rock (University of Arizona) is leading the project as Principal Investigator (PI) with co-PI's Shane Snyder (U of Arizona) and Kati Bell, et al (CDM Smith). This project has three primary components: (1) determine what criteria are needed to evaluate the safety of direct potable reuse water, (2) evaluate methods used for the assessment of DPR, and (3) collect data from full scale facilities to evaluate treatment efficacy of different treatment trains. The project will include participation from both direct and indirect potable reuse systems. We are asking participating utilities to fill out a survey to share what their treatment train involves, what they monitor for, and historical baseline monitoring data. They can also participate in a sampling program to collect more rigorous water quality information if desired.

Please see the attached commitment letter example and the 3 tier levels of possible participation. Would you all be willing to participate at any level? The DPR project you are doing is so groundbreaking and your data would be invaluable to helping with research.

Please let me know. However I can assist you with this, I am willing to donate my time too. Thanks for your consideration!
