Subject: RE: DPR / Kemp water

Russell,

It's good to hear from you. I am sorry to hear Lakes Arrowhead and Kickapoo did not benefit from the recent rains. We will be happy to work with the City and your engineer. I understand the City will be going out for bids on October 14, 2014 for a UV reactor. When do you anticipate bringing TCEQ a request for a new exception? We are open to having pre-planning meetings, if the City finds that option helpful.

Subject: DPR / Kemp water

Linda
Haven't talked to you in a while and I wanted to give you an update on our current water supply situation.

Our DPR project is operating very well has been a real lifesaver for us during this drought. Unfortunately the drought persists here in the WF and surrounding area and our lakes continue to decline. The combined capacity of Lakes Arrowhead and Kickapoo is currently at 21.9% and no rain in the foreseeable future.

Therefore, to prepare for the continuation of the drought and to shore up our water supply, the City has hired Freese and Nichols to develop a plan to incorporate the remaining water in Lake Kemp into our DPR project. David Sloan is the design engineer and he will be in contact with Joel and your team in the near future.

As always. we appreciate your attention and consideration of our situation and we look forward to working together to extend WF water supply.
