**Subject:** RE: City of Wichita Falls - TCEQ Response to Reuse Project

I've passed on this TCEQ info to our permitting guy to confirm, but as I read this, going to Lake Arrowhead wouldn't require all the additional log removals since it is IPR. I would like to talk to my guy first before our call, so let me see if the two of us can connect Monday morning and then we could talk Monday afternoon. (he's been out all day today)

I will update you Monday.

Thanks,  
Susan

Well doesn't look like Red has moved any from his closed minded view and trying to cram every scenario into the same sized box. Based on "Draft guidelines" that have not been adopted by the TCEQ and placed in the Texas Admin code as enforceable rules and regs only because that is what he was able to force onto 2 other municipalities. He appears to be more concerned with how to kill a project rather than make one work, of course this has always been his MO.

Susan where are we on the regs for discharge into Lake Arrowhead? As I read the Draft guidelines appears to me any water body that receives wastewater effluent and the water is then also used as a drinking water source, would be considered IDP, based on the definition provided. As such then every treatment plant that uses this water must meet Red's preposterous log removals. I'm pretty sure all the WTPs down stream of Dallas that use the Trinity as a drinking water source are not required to have the multiple barriers and the to meet the removal rates.

I need to know that if we apply for a discharge permit into Lake Arrowhead, that it would not be considered IDP and that we would not now be subject to these ludicrous log removal rates with multiple treatment barriers.

Why can't this be as simple as demonstrating that the effluent is cleaner than the lake water, based on analysis as a source water for potable purposes, and will not be detrimental if blended with lake water and is a very good source of water. The source is the only reason all the additional requirements are being forced on us. Is there a way for us to get Red past this fact.

When is everyone available for another conf call to discuss our next move?

Russell,

I found why you didn't receive this. Joel misspelled your last name on the e-mail chain.  
Enjoy.

Ms. Crawford,

Please see the attached letter and enclosures with TCEQ's response to the City of Wichita Falls' proposed reuse project.

I will be out of the office for the next two business days. Per the contact information in the letter, questions and/or comments can be directed to Mr. Red Weddell at [325-481-8056](tel:325-481-8056) or [James.Weddell@tceq.texas.gov](mailto:James.Weddell@tceq.texas.gov).

Thank you,

Joel Klumpp
