Subject: RE: Testing Protocol for Wichita Falls Pilot

Hi Mark, we may have gotten a little confused on those. I think the original plan was for the City to test those, but I understand your instrument for THM measurement is out of service. If you could have those processed with the next batch of similar samples for the City and then let us know what the corresponding charge is, that would probably be the simplest approach.

Mike: Please chime in if you have a different recommendation.

Mark & Hunter, Thanks again for your hospitality and assistance with this effort.

Best regards,

DAVID SLOAN / FREESE AND NICHOLS, INC.

David,

Hunter, our Lab Supervisor, said there are 4 THM samples left in the refrigerator, do those need to be mailed to Eaton?

Chris –

Amazon is shipping out extra freezer gel packs that should be delivered to Cypress tomorrow. When you get to Cypress make sure to unpack those first and re-freeze. There is an additional shipment of insulated shipping boxes that will be delivered on Wednesday. At least one of these boxes will be for packing up the samples (with room for gel packs) to send to Hazen & Sawyer. -Mike

David and Mike,

I'll print out and bring the blank Daily Pilot Reports. My cell phone number is [\(972\) 358-0998](tel:9723580998) if you need to contact me.

Looking forward to it!

-Chris

Chris / David –

I have attached the updated protocol following the discussion with Trojan on Friday.

Chris –

I would recommend printing out at least 4-dozen, blank Daily Pilot Reports to take with you to Wichita Falls. I will be available anytime on Tuesday and until 5:30 pm on Wednesday. My cell phone number is [919-599-1982](tel:9195991982).

Thanks!

-Mike

Chris: I'm forwarding the current testing protocol for the research project in Wichita Falls next week. Mike Watts with Garver is the lead investigator. We had a call this afternoon with Trojan UV, and Mike is going to be tweaking the protocol with some refinements we discussed. I'll be visiting with you more to firm up all the logistics, but wanted you to have this as a starting point.

Have a good weekend.

All –

Please see the attached testing protocol for discussion on the call this afternoon.

Thanks,

Mike
