Linda, Joel

I wanted to let you know I have invited Brad Castleberry to attend the mtg on the 14th as well. I know you guys like to know when an attorney will be at a mtg. His role is strictly observatory, just to keep him in the loop on everything we are doing related to reuse.

Hope you have a Merry Christmas

David and Russell,

We look forward to meeting with you January 14th to discuss the City's proposal to incorporate Lake Kemp water into the DPR project. Any information you can provide to us about your proposal in advance of the meeting will help our project team be better prepared to discuss this.

Thanks,

Joel

Joel: January 14 sounds like a winner. Thanks for reserving this. We'll look forward to meeting with you then.

Happy Holidays!

David,

Wednesday, January 14, works best for us. Please confirm that time still works for you and Russell and we will reserve a conference room from 1:00-4:00 that day.

Thanks,

Joel

Joel: This is to follow-up on scheduling a meeting for January. Russell and I have compared our calendars, and it appears the following days would be open for the City and FNI:

Wed., Thurs., January 14 or 15
Mon., Wed., Thurs., January 19, 21 or 22

Due to the significant travel distance required for the City, an early afternoon meeting would be preferred. If nothing is available for the above dates, we will look at available dates on the following week.

Thanks for your consideration.

DAVID SLOAN / FREESE AND NICHOLS, INC.

Subject: RE: Wichita Falls DPR Authorization Extension

Russell,

Thank you for your email. We have checked our calendars for Monday and unfortunately we are booked that day. This is a busy time for us as we try to complete some deliverables before the holidays.

We will be happy to schedule a meeting with you for the beginning of January. Please let us know what dates and times work best for you.

Regards,

Joel

Linda, Joel

I know this is very short notice, but I am going to be in Austin, meeting with Louis Herrin on Dec 15. The exact time has not been established yet, but my thought was since I am going to be there in Austin, and if your schedules allowed, Myself and David Sloan would like to meet with you and discuss our proposal to incorporate Lake Kemp water into our DPR project.

Again I know this is very short notice, and if it doesn't work, that's fine, but if you could let me know your availability I would appreciate it. I am going to be out of the office on Friday, so if we can't get anything worked out before then, don't worry about it.

Thanks

Dear Ms. Brookins & Mr. Klumpp:

As noted in a recent conversation between Russell Schreiber and Linda Brookins, the City of Wichita Falls and their consultant team has aggressively pursued acquisition and installation of Ultraviolet Disinfection reactors to meet TCEQ requirements for extended operation of their Direct Potable Reuse facility beyond the initial 6 month approval. Through close cooperation between the TCEQ, the City, manufacturers and consultants, this implementation is proceeding rapidly, but it is now clear that additional time will be needed before the additional equipment can be made operational. Two reactors have been purchased and are anticipated to arrive in Wichita Falls later this month. The City received bids on Tuesday, December 2 for installation of the reactors, including piping, valves, electrical and instrumentation. The City will award this contract on December 16, and the installation contractor will have up to 45 days to complete their work. At each step, while communicating with TCEQ for direction, the City has proceeded at risk in order to meet the approaching deadline. TCEQ staff has been very responsive, recognizing the hardship imposed by the current drought.

The DPR operation has played a critical role these past several months in extending the dwindling supplies remaining, and the citizens of Wichita Falls have responded as well, openly accepting this new source of supply while drastically reducing water usage. The plant has performed reliably, producing excellent water quality, with no excursions from required or expected criteria. In fact the water quality produced now is better than that produced during the verification testing period, due to the recent replacement of the RO membrane elements.

Recognizing the City's diligence in meeting the required additional disinfection, and in continuing to safeguard the high quality of this additional source water, the City of Wichita Falls respectfully requests extension of the current DPR authorization through February, 2015, by which time the UV disinfection facilities should be fully functional. Please feel free to contact me if there are any questions or if additional discussion is required.

Best regards,
