Subject: Re: TCEQ Meeting

Russell,

I have an appointment 4/30 from 8 to 9, but after that, I am available to travel to Austin. So, on 4/30 an afternoon meeting would be best.

Everyone

Spoke with Linda this morning and her team has been occupied with some other pressing issues, but do believe they will be ready to discuss our Kemp proposal near the end of the month. Please hold the 29th and 30th open for a conf call to discuss the project. Linda will narrow this down for us when her staff returns and I will pass it along.

She did indicate conceptually TCEQ is in general agreement with the concept, but she did elude to then requiring a longer initial start-up period, something along the lines of a month to determine impacts and recovery of the MF/RO units after a CIP. They are also working on the revisions to the original approval letter to include the UV and the Kemp water. She did say we would definitely have the opportunity to comment on the letter before it is final.

I reiterated to her our intention to have the water in the system by July 1, and she seemed to think that was not a problem. We discussed the lead tome for the pumps, she also indicated she would look into getting us approval for the pumps earlier so we can go ahead and order them.

I'll let you know of any updates as they come in.

Have a good weekend.

Ok Dave

Thanks for inquiring.

Sounds like they have everything they need. I sure would like for them to give us an opportunity to review and discuss the letter before it is final, sure would give everybody allot more flexibility.

> Russell: I spoke to Joel Klumpp. He did not think a meeting would be particularly productive at this point. He felt his staff has a good understanding of what we are requesting, and he is thinking it would be more helpful to schedule a meeting when they have a draft letter of authorization available to review and discuss. He emphasized that they are giving this priority attention, but they seem to be satisfied with the information provided and are working through it to develop a replacement for the August 5 letter.

>

> He could not promise that they would be able to provide an advance copy of the draft letter but I said that would very much be appreciated. He understood, but said that decision was usually not up to him.
